

METAPHYSICAL BIBLE INTERPRETATION

"The Soul's Journey"

Introduction

The Old Testament contains the history, songs, prayers and prophecy of the Hebrew, Israelite, and Jewish experience. This experience parallels and at times duplicates the stories that have come to us from all the worlds nations and cultures.

This is a universal experience. The symbols are different in appearance, yet the same in meaning. They point to the awareness of the activity of the Divine: Spirit, Cosmic Consciousness, God, in the lives and activities of its people.

The Bible is our story. The story of our individual soul's unfoldment. We all exist somewhere in each of these stories. By opening ourselves to the lessons available through the symbology, we open ourselves to experiencing life more awake and alive, a more fulfilling and joy filled existence.

"You are the light of the world"
